

CASE STUDY No 10: Concrete Dosing and Batching Plant

The Brief:

To manufacture a complete concrete wetcast plant including all electro mechanical requirements for PLC controlled work stations.

Summary:

A turnkey project for USA. All parts were manufactured and assembled in the UK, fully tested, striped down and shipped by container to USA.

A small team of engineers attended the new build in the USA to ensure a trouble free installation. Project completed within timescale and budget.

Date:

2007
