

## CASE STUDY No 3: Nitrous Oxide Filtration Plant

### The Brief:

To design and build a portable Nitrous Oxide filtration plant as a sales tool for a major Scandinavian client to allow shipping around the world.

### Summary:

The design encompassed the fitting of all key parts of the plant in both an assembled and disassembled state for easy shipment in a standard 40 foot shipping container..

All external equipment when stripped down is positioned inside the container and secured ready for shipment.

First point of shipping was to Sri Lanka

### Date:

2008/9
