

CASE STUDY No 6: Golf Course Mowers & Sweepers

The Brief:

To assist in the design and manufacture of a range of quality grass cutting and collection products for use mainly in areas requiring high quality finishing, for example Golf courses

Summary:

The finished products have sold in volume for the customer over the past few years, with new orders continuing to arrive on a regular basis.

The paint finish provided by PEC's in house paint plant compliments the finished product and provides for years of service.

Many products for this client are manufactured, painted and fitted out to their final stages allowing direct shipment into their distribution network. This has reduced the transportation costs considerably, allowing the client company to save costs.

Date:

2007/2008
